order to reduce the risks associated with any one security, utilize a variety of investments and performance will depend on the Asset Management Company's ability to assess

The Scheme also intends to participate in derivatives trading within the equity component of their portfolios. The scheme intends to use derivatives instruments like options on stocks and

stock indices, interest rate swaps, forward rate agreements or such other derivative instruments as may be introduced from time to time subject to framework specified by SEBI, for the purpose of hedging, portfolio balancing and other permitted usages as provided under the regulations and guidelines.

RBI has permitted Mutual Funds to participate in Interest Rate Swaps and Forward Rate Agreements. SEBI has also permitted trading of interest rate derivatives through stock exchanges. The scheme may also trade in these instruments

From time to time it is possible that the portfolio may hold cash. Investments may be made in listed or to be listed instruments. Listed securities may be listed on any of the recognised Indian stock exchanges including the National Stock Exchange. Investments may be made as secondary market purchases, initial public offers, private placements, negotiated investments, rights offers, etc. The Mutual Fund under this Scheme may invest in non-publicly offered debt securities (including convertible securities). The investments may have tenors that could be short-term (i.e. less than one year) or long-term (i.e. greater than one year). The Scheme reserves the right to invest in newer investment products including foreign securities (i.e. offshore investments) subject to approval of the Trustee Company and in compliance with the applicable SEBI Regulations.

Not more than 5% of the net assets of the Scheme may be invested in equity and equity-related securities that are listed or to be listed on any stock exchange. Any such investments will only be made if the Asset Management Company believes that such securities may be listed within a two-year period. This policy, however, is not applicable to the Scheme's acquisition of equity and equity related securities in initial public offerings that at the time of acquisition are not yet either listed or quoted on any stock exchange, but pursuant to the terms of such initial public offering will be so listed. The Mutual Fund under this Scheme, will not invest more than 10% of its net assets in the debt (including non-publicly offered debt securities) and money market securities of any one issuer excluding call money.

Upto 5% of the Scheme's net assets may be invested in listed or to be listed equity and equity-related securities as stated in the previous paragraph. Further, since a significant section of the debt market consists of non-publicly offered debt securities, the Scheme could invest upto 25% of its net assets in non-publicly offered debt securities.

Notwithstanding the foregoing investment policies for the scheme, for temporary defensive purposes (e.g., during periods in which the Asset Management Company believes changes in the securities market or economic or other conditions warrant), the scheme may invest in Indian Government T-Bills and hold cash or cash equivalents and other money market instruments. The Trustee of the Mutual Fund may from time to time alter these limitations in conformity with the SEBI (MF) Regulations, 1996 and other guidelines or notifications that may be issued by SEBI.

The Scheme may engage in short selling of securities in accordance with the framework relating to short selling and securities lending and borrowing specified by the Board.

Cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure. SEBI vide letter dated November 3, 2021, has clarified that Cash Equivalent shall consist of Government Securities, T-Bills and Repo on Government Securities.

### **Portfolio Turnover**

The scheme has no explicit constraints either to maintain or limit the portfolio turnover. Portfolio turnover will depend upon the circumstances prevalent at any time and would also depend on the extent of volatility in the market and inflows/outflows in the scheme. The Fund Manager will however endeavour to maintain a low portfolio turnover rate. A higher churning of the portfolio could attract high transactions of the nature of brokerage, custody charges etc.

### Portfolio Rebalancing

Rebalancing due to Short Term Defensive Consideration

Due to market conditions, the AMC may invest beyond the range set out in the asset allocation. Such deviations shall normally be for a short term and defensive considerations as per para 1.14.1.2 of SEBI Master Circular on Mutual Funds, and the fund manager will rebalance the portfolio within 30 calendar days from the date of deviation.

Rebalancing due to Passive Breach:

Further, as per para 2.9 of SEBI Master Circular on Mutual Funds, as may be amended from time to time, in the event of deviation from mandated asset allocation due to passive breaches (occurrence of instances not arising out of omission and commission of the AMC), the fund manager shall rebalance the portfolio of the Scheme within 30 Business Days. In case the portfolio of the Scheme is not rebalanced within the period of 30 Business Days, justification in writing, including details of efforts taken to rebalance the portfolio shall be placed before the Investment Committee of the AMC. The Investment Committee, if it so desires, can extend the timeline for rebalancing up to sixty (60) Business Days from the date of completion of mandated rebalancing period. Further, in case the portfolio is not rebalanced within the aforementioned mandated plus extended timelines the AMC shall comply with the prescribed restrictions, the reporting and disclosure requirements as specified in para 2.9 of SEBI Master Circular on Mutual Funds .

### **Investment Strategy**

The fund manager would primarily focus on long term growth for identifying stocks. The objective would be to identify business with superior growth prospects and strong management available at reasonable valuation and offering higher risk adjusted returns. The Scheme would follow blend of bottoms up approach (for stock selection) and top down approach (for sector allocation). The Scheme would follow flexi cap approach on market cap depending on risk return profile of various sub segments of the market. The decision to sell would be based on price reaching its fair value or availability of alternative investment opportunity offering higher risk adjusted returns or anticipated price appreciation no longer possible due to change in business fundamental.
