Scheme Category	Exchange Traded Fund (ETF)		
Investment Objective	The investment objective of the Scheme is to generate returns that are in line with the performance of gold, subject to tracking errors. The Scheme does not guarantee/indicate any returns. There is no assurance or guarantee that the investment objective of the Scheme will be achieved.		
Asset Allocation Pattern of the scheme	Under normal circumstances, the asset allocation of the Scheme will be as follows:		
			Indicative Allocations (% of total Assets)
	Instruments	Minimum	Maximum
	Physical gold	95%	100%
	Debt & Money market instruments (including Cash and Cash Equivalent)	0%	5%
	Indicative Table (Actual instrument/percentages may vary subject to applicable SEBI circulars)		
	Sr. no	Type of Instrument	Percentage of exposure
	1.	Securitized Debt	The Scheme will not invest in securitized debt.
	2.	Overseas Securities	The Scheme will not invest in Overseas securities.
	The Scheme will invest in physical gold of the prescribed quality and standard.		
	A small portion of the net assets will be invested in Debt and money market instruments as permitted by SEBI / RBI including call money market or Tri-party Repo on Government securities or treasury bills or repo or in an alternative investment as may be provided by RBI, to meet the liquidity requirements of the scheme. From time to time, the Scheme may also hold cash.		
	The cumulative gross exposure through physical gold, Debt & Money market instruments (including Cash and Cash Equivalent) and such other securities/assets as may be permitted by the Board from time to time subject to regulatory approvals, if any should not exceed 100% of the net assets of the scheme.		
	Cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure. SEBI vide letter dated November 3, 2021 has clarified that Cash Equivalent shall consist of Government Securities, T-Bills and Repo on Government Securities.		
	Portfolio Rebalancing		
	Rebalancing due to short term defensive consideration:		
	The Scheme shall primarily invest in Physical Gold and invest a small portion of its net assets in debt and money market securities, to meet the liquidity		

	<p>requirements (for honouring expenses / repurchase / redemptions / etc). In view of the nature of the Scheme, the asset allocation pattern as indicated above may not change, except in line with the changes made in SEBI (MF) Regulations, from time to time.</p> <p>Subject to the SEBI (MF) Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, and political and economic factors. Such changes in the investment pattern will be for short term and defensive considerations as per para 1.14.1.2 of SEBI Master Circular on Mutual Funds . However, due to market conditions, the AMC may invest beyond the range set out above. Such deviations shall normally be for a short-term purpose only not exceeding 7 days, for defensive considerations and the intention being at all times to protect the interests of the Unit Holders.</p> <p>Provided further and subject to the above, any change in the asset allocation affecting the investment profile of the Scheme shall be effected only in accordance with the provisions of sub regulation (15A) of Regulation 18 and Regulation 25(26) of the SEBI (MF) Regulations.</p>
Investment Strategy	<p>Aditya Birla Sun Life Gold ETF is a passively managed fund tracking the price of Gold and reflects the performance of the Gold price. The Fund would invest in physical gold of prescribed quantity and quality (fineness) and endeavor to track the spot price of gold. The scheme invests in gold regardless of investment merit. The Fund would invest upto 100% in physical Gold and/or upto 5% in debt and money market instruments to meet the liquidity requirements, subject to tracking error. The scheme may buy or sell gold at different points of time during the trading session at the then prevailing prices which may or may not correspond to its closing price, due to disinvestments to meet redemptions, transactions cost and recurring expenses, execution of large buy/sell orders etc.</p> <p>The Fund Manager would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. Under normal circumstances, such tracking errors are not expected to exceed 2% per annum subject to compliance with para 3.6.3.1 of SEBI Master Circular on Mutual Funds .</p> <p>However, this may vary due to the volatility in the markets and any other reasons beyond the control of the Fund Manager. There can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the benchmark Index.</p> <p>Effect of Movements in the price of gold on the NAV of Aditya Birla Sun Life Gold ETF: As movements in the price of gold are expected to directly affect the NAV of the scheme investors should understand the impact of fluctuations in the price of gold on the NAV of the scheme. Investors, however, should also be aware that past movements in the gold price are not indicators of future movements.</p> <p>Portfolio Turnover</p> <p>Portfolio Turnover measures the volume of trading that occurs in a Scheme's portfolio (gold in this scheme) during a given time period. The Scheme is an open-ended Exchange Traded Fund. It is therefore expected that there would be a number of subscriptions and redemptions on a daily basis through Stock Exchange(s) or with Aditya Birla Sun Life Mutual Fund directly by Market Makers and Large Investors that may require purchase or sale of gold. In view of the nature of the Scheme, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio. Portfolio Turnover is defined as the aggregate of purchases and sales as a percentage of the corpus during the specified period of time.</p>
Risk Profile of the Scheme	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the Scheme Information Document carefully for details on risk factors before investment. Scheme specific Risk Factors include but are not limited to the following:</p>

	<ul style="list-style-type: none"> • Liquidity Risk: Trading in units of the scheme on the Exchange may be halted because of market conditions or for reasons that in view of the Exchange authorities or SEBI, trading in units of the scheme is not advisable. In addition, trading in units is subject to trading halts caused by extraordinary market volatility and pursuant to Stock Exchange(s) and SEBI “circuit filter” rules as applicable from time to time. There can be no assurance that the requirements of the exchange/s necessary to maintain the listing of units of the scheme will continue to be met or will remain unchanged. The Mutual Fund scheme has to sell gold only to bullion bankers/traders who are authorized to buy gold. Though, there are adequate number of players (commercial or bullion bankers) to whom the Fund can sell gold. However, the Fund may have to resort to distress sale of gold if there is no or low demand for gold to meet its cash needs of redemption or expenses. • Counter party Risk: There is no Exchange for physical gold in India. The Mutual Fund may have to buy or sell gold from the open market, which may lead to counter party risks for the Mutual Fund for trading and settlement. • Redemption Risk: Investors may note that even though this is an open ended scheme, the Scheme would repurchase units in creation unit size only. Thus, if the unit holding is less than the creation unit size then it can be sold only through the secondary market on the exchange where the units are listed, subject to rules and regulations of the Stock Exchange. The AMC will appoint Market Maker(s) to provide liquidity in secondary market on an ongoing basis. The Market Maker(s) would offer daily two-way quote in the market. Further the price received upon redemption of units may be less than the value of the gold represented by them. • Liquidity risks in physical or derivative markets impairing the ability of the fund to buy and sell gold Commodities tend to be more volatile than other instruments. This may have an impact on liquidity. Liquidity considerations may have a price basis risk. Liquidity risks may arise due to issues related to the supply chain which affects the availability of gold. The lack of liquidity in the physical market may also arise due to seasonality of demand and supply or volatility of prices. Lastly, government regulations including change in taxation or duties levied on gold may affect the demand and supply and may affect the liquidity • Risks associated with handling, storing and safekeeping of physical gold: There is a risk that part or all of the Scheme's gold could be lost, damaged or stolen. Access to the Scheme's gold could also be restricted by natural events or human actions. Any of these actions may have adverse impact on the operations of the scheme and consequently on investment in units. <p>The above are few of the risks involved with investments in the scheme. Further, the scheme shall be subject to, but not limited to, risks associated with investments in physical gold, currency risk, operational risks, market risks, regulatory risk etc. The scheme may invest in debt and money market instruments to meet the liquidity requirements. Accordingly scheme shall be subject to risks associated with investments in Fixed Income securities such as Price-Risk or Interest-Rate Risk, Credit Risk, Liquidity or Marketability Risk, Reinvestment Risk etc. (Please refer to Section on Risk Factors in Scheme Information Document for detailed scheme specific risk factors.)</p>
