Term of the Day

Cash flow /fund flow statements, discounted cash flow

Definition: A Cash Flow Statement refers to the financial statement which states inflow and outflow of cash and cash equivalents during a particular period. Such statement is useful in case of assessing the ability of an enterprise to generate cash or cash equivalent and developing models to assess and compare the present value of future cash flows of different enterprises.

Explanation

Fund Flow Statement, on the other hand, shows the inflow and outflow of funds, that is, sources and applications of funds for a particular period. It is used to analyse the changes in the working capital position of a company. There exists a basic difference between cash flow and fund flow statements. While the former takes into account only transactions involving cash and cash equivalents, the latter is based on accrual system of accounting.
